

PUNTADEMITA
FOUNDATION

December 20th, 2008

Dear fellow residents of Punta de Mita,

As the year 2008 ends, the Punta de Mita Foundation finishes its first year of operation and we are proud to say that it has been a successful one. We accomplished much of what we set out for ourselves, but there is still much more to do. Funding is important so that we can continue the programs we have initiated, to improve our community and region, and as well, protect our investments.

This packet contains information about the Foundation, everything you need to make a decision on how you would like to participate. We understand that budgets have tightened and we are all feeling the effects of a global recession. When looking through this information we ask that you not only consider how your pledge will help the children and people in the region, but how this will effect your investment in Punta de Mita.

If these two towns are socially and economically strong, our investments will remain strong and even appreciate. However, if there are social problems and issues, if there is not economic opportunity, our investments and ability to enjoy our properties will be effected in turn. We are integrally tied in with these two communities.

We encourage everyone to make a donation, small or large, and play a part in helping improve our communities for the benefit of everyone.

Thank you and best regards,

Punta de Mita Foundation Executive Board
